

## 2007 APPLE RIPENING DATES TABLE

Most of our growers are marketing apples for fresh eating. It is convenient for them to have selections that ripen on a range of dates and that have some storage and shelf life. The bolded selections represent the best selections that ripen on or near that date. These choices were based on sensory evaluations, storability, disease resistance and winter hardiness. Changes will be made to this table each year as we collect more information.
