

APPLE CULTIVARS NAMED BY PAPI 2010

The following is a list of apple cultivars named by Prairie Apple Producers Incorporated (PAPI). They were grown in large numbers as test trees for the Fruit Program and were named by PAPI for the purpose of selling the fruit. At this time the University of Saskatchewan does not recommend them for propagation.

Test No.	Name	Parentage	Brief Description
4-6-48	Patience	Westland X Haralson	Ripe 13 Sept. Very attractive 90 to 100% stripe and wash red over light greenish yellow, very smooth round conic shape, very rich sub acid flavor high in astringency, texture med firm very crisp and juicy with very good storage life.
4-10-36	Anna Gold	Brookland X Honeygold	Ripe 17 Sept. A small yellow apple much like Golden Delicious
5-2-52	Granny Annie	Westland X Haralson	Ripe 30 Sept. Like Granny Smith but with 80% red over colour.
5-4-14	Petrofka Mack	M359 X Breakey	Ripe 8 Sept. Much like MacIntosh
5-6-33	Celeste	Westland X Lobo	Ripe 30 Aug. A good quality large red apple.
18-8-9	Red Mike	Brookland X MacIntosh	Ripe 9 Sept. Texture, colour and shape much like MacIntosh only smaller. Subacid flavor with a very nice aromatic component.
18-17-11	Prairie Rose	Lobo X Brookland	Ripe 16 Sept but will hang on the tree in good condition until Sept 30, a good keeper. A very smooth attractive solid red apple with firm flesh. Round slightly oblate. Sour with tasty aromatics.
18-22-23	Sweet Saffron	Pioneer #60 X Westland	Ripe 8 Sept but hangs on the tree in good condition for at least two weeks. Sour with good aromatic flavor, good texture. Mostly light greenish yellow with 10% pink blush and splash, prominent lenticels.
